

Intro

The Techno Synth Construction Yard 32 MB ROM is a stunning collection of great new sounds designed for the dance, ambient and techno producer or artist. European sound designer Rob Papan has assembled over 600 of his best samples and coupled them with the Proteus 2000's ultra-powerful synth engine to create a sound set like you've never heard before!

Proteus' 12 knob controllers let you tweak sounds to your heart's content. Presets can morph into completely new sounds and textures at the touch of your fingers.

Explore the presets by pressing the Audition button! The Techno Synth Construction Yard includes 136 spankin' new RIFFs which you can use as backing tracks in your music.

Note about the Drumsets

Almost all drum sets use Layer 1 for the Bass Drums, Layer 2 for the Snares, Layer 3 for the rest, Layer 4 for only the hi-hats. This means also that the open hi-hat and closed hi-hat work together like real drums!

This layering is also useful when using separate outputs or adding FX. In the basic setting of the presets the knob controllers for FX-A and B work only on Layer 2 (snares) and Layer 3 (rest of percussion and drums).

Layer 1 and Layer 4 will stay dry for the FX-A knob (K).

The non-GM sets have extra Bass and Snare Drums in each kit. Also Note: Many presets have a drum kit located at C-2 to A#1.

Note about the MIDI G and MIDI H Controllers

Almost all presets use clocked LFOs (MIDI G and MIDI H) to make the sound sync with your song.

About Rob Papen

Rob Papen (1964) is a European (The Netherlands) sound designer and artist. He had two number one hits in his musical career (with his synthesizer group Nova and Peru), and has created over 15 CDs of electronic music.

Because of repeated requests by studios for his personal sounds, Rob began releasing sound sets for different synthesizers starting in 1990. Today Rob is world renowned for his creative and cutting edge sound design. Rob's expertise and experience is made even more evident with the introduction of the Techno Synth Construction Yard.

Techno Synth Preset & Instrument Categories:

Drum Layouts

Most of the drum maps are duplicated in several Instrument locations which provide variations on the basic layout. We have only provided layouts for the most common drum maps. Check E-MU's web site at www.emu.com for more information about the drum maps and controller assignments.

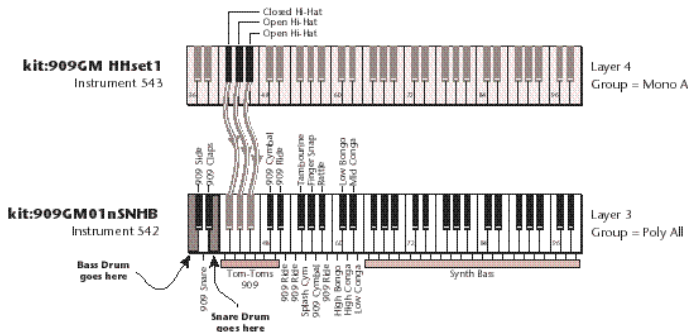

All the kit:909 presets use this basic template with different sounds on a few keys.

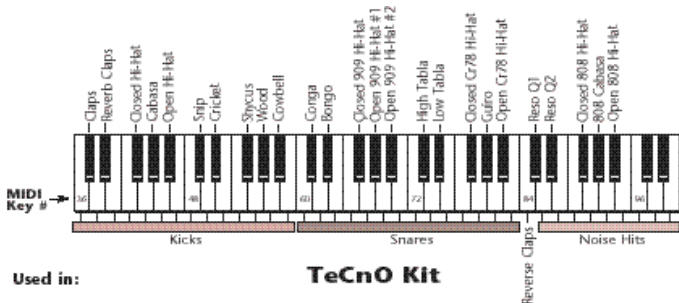

Preset kit “GM Groove 2” (#55, bank 0) utilizes a modified GM Instrument kit with one bass drum, snare and hi-hat set removed. This allows you to layer the main Instrument (#542) with other Instrument layers that fill in the missing spaces.

Drum Maps

In this Preset, Instrument 543 “kit:909GM HHset1” on Layer 4 contains only the hi-hats mapped to the correct locations. Layer 1 contains only a bass drum and layer 2 contains only a snare. Select different instruments on layers 1, 2 & 4 to customize the basic drum map.

Partial drum maps are especially useful in the case of hi-hats. In a real drum set the open and closed hi-hats cannot sound simultaneously. Closing the hi-hat cuts off the open sound and visa-versa. To program this action in Proteus, the hi-hats are assigned to their own layer and the Assign Group parameter is set to one of the Mono groups (mono A-I). Now the hi-hats will be monophonic (and cut each other off) and the rest of the drum kit (on another layer) will be polyphonic.

Bank 1 111 kit:909 BD proce, 112 kit:909 BD clean

Drum Maps

Used in: Bank 0

057 kit:GM TeCnO 7, 058 kit:GM TeCnO8, 059 kit:GM TeCnO 9,
106 kit:GM TeCnO 1,107 kit:GM TeCnO 2, 113 kit:GM TeCnO 3,
114 kit:GM TeCnO 4, 115 kit:GM TeCnO 5

All kits labelled: **GM Dance**, **GM Groove**, **GM 909** use this map with different BD (C1), SN (E1) and HH.

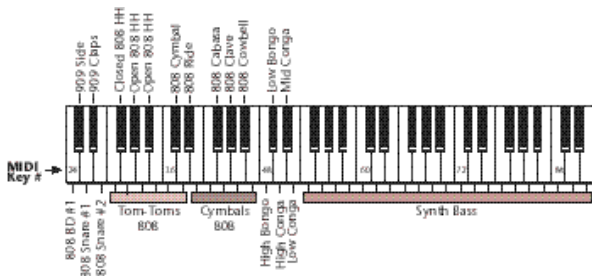

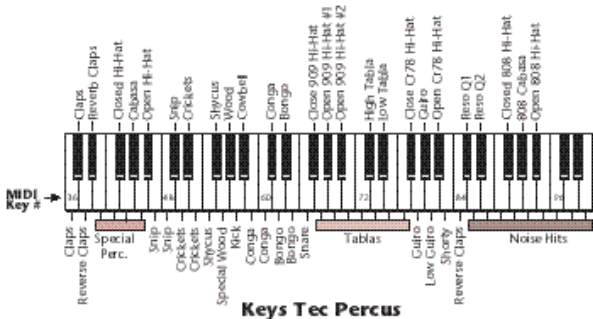

This Instrument conforms to General MIDI from B0 to E3.

MIDI D adds a pitch modulation effect.

MIDI G adds clocked stereo panning (except the kick).

Mod Wheel slows the attack and is useful for special grooves.

MIDI F works only on the snare at E1.

Note: All GM Dance & Groove kits use this basic template.
